

Instruction

Using Animals in the Educational Program

Animals may be brought into school facilities for educational purposes only according to procedures developed by the Superintendent assuring: (a) the animal is appropriately housed, humanely cared for, and properly handled, and (b) students will not be exposed to a dangerous animal or an unhealthy environment. No student shall handle classroom animals without written permission of a parent/guardian and permission from the teacher. Such animals are to be kept in the classroom for the time necessary for their study only. If animals are to be kept in the classroom on days when classes are not in session, arrangements shall be made for their care.

Experiments on living animals are prohibited; however, behavior studies that do not impair an animal's health or safety are permissible. The dissection of dead animals or parts of dead animals shall be allowed in the classroom only when the dissection exercise contributes to or is a part of an illustration of pertinent study materials. All dissection of animals shall be confined to the classroom and must comply with The School Code.

Students who object to performing, participating in, or observing the dissection of animals are excused from classroom attendance without penalty during times when such activities are taking place. No student will be penalized or disciplined for refusing to perform, participate in, or observe a dissection. The Superintendent or designee shall inform students of: (1) their right to refrain from performing, participating in, or observing dissection, and (2) which courses contain a dissection unit and which of those courses offers an alternative project.
